

Natalya Lazareva

Fullstack Developer · React · React Native · Java · AI/ML Tooling

Summary

Fullstack developer with 12+ years of experience shipping production software across web, mobile, and backend. Comfortable owning the full stack — from architecture decisions to App Store release. Currently deepening into AI/ML: building with LLM APIs, exploring agentic systems, and developing personal AI tooling. I bring business value thinking alongside technical execution.

Experience

Freelance Developer

2026 — present

- Built and shipped a **kids' English-learning mobile app** (iOS + Android, Flutter) with a hand-crafted claymation visual style.

Backend Developer — Lanceit LTD

2025 — Feb 2026 (~8 months)

- Built and maintained Java backend services in production, including REST endpoints integrating AWS services.
- Wrote unit tests with Mockito and set up CI pipelines with Jenkins.
- Implemented permissions and security between internal services.

Freelance / AI Tooling

2025

- Built and shipped **Satori** (iOS + Android, live): gamified habit tracker with RPG progression system, streak tracking, IAP, and multiple themes. 100+ organic users with no marketing.
- Developed **AI-powered calorie tracker** (mobile, Expo/EAS): camera-to-nutrition using AI vision API, Cloudflare Workers backend.
- **snippet_lib** (open source, in progress): developer knowledge base in Next.js 16 with AI-generated structured content, SQLite, dark-first UI.
- **LocalPilot** (personal project): self-hosted AI workspace with multi-provider chat (local MLX, Anthropic, OpenAI), per-project RAG, Git webhook ingestion, MCP server integration. Svelte + FastAPI + ChromaDB.
- Freelance image restoration for museum documentary project: halftone newspaper archive preparation for print, AI-assisted descreening pipeline.

Senior Frontend Developer — AI Matrix

2024

- Architected and built **admin dashboard for ML model management**: Next.js, TypeScript, Recoil, Mantine UI.
- Built real-time **chat interface** with WebSockets and full REST API design and implementation.

Fullstack Developer — Lanceit LTD

2021 – 2022

- Worked on **Financial Portal migration** to React, Redux, TypeScript, and Micro Frontend (MFE) architecture as part of the team.
- Built cross-platform **iOS/Android apps** with React Native, Reanimated, NativeWind, and Canvas; backend on Django with Docker and Nginx; Supabase integration (full-stack ownership).
- Upgraded legacy **AngularJS/C# stack** to Angular 15.
- Redesigned UX/UI component library using Ant Design.

Frontend Developer / IT Specialist — Politech LTD

2013 – 2020

- CMS development for large industrial enterprise clients.
- Project lifecycle ownership: requirements gathering → development → release → client training.
- Workflow optimization, technical documentation, staff mentorship.
- Team coordination (up to 5 members), Agile/Scrum facilitation.

Technical Skills

- **Frontend**: React, Next.js, Angular, TypeScript, Redux / MobX / Recoil, Tailwind CSS, Ant Design, Canvas
- **Mobile**: React Native, Expo / EAS, Reanimated, Flutter, Swift (Anchor'77, shipped)
- **Backend**: Java, Python, FastAPI, Django, Node.js, REST API design, WebSockets
- **AI/ML**: Anthropic API, OpenAI API, Cloudflare AI Workers, RAG pipelines, ChromaDB, LM Studio, MLX, LoRA fine-tuning exploration
- **Infrastructure**: Docker, GitHub Actions, Azure DevOps, Supabase, SQLite, PostgreSQL
- **Design**: Figma, Adobe Illustrator, InDesign (former technical designer)

Personal Projects (selected)

- **Brain Engine** — symbolic AI reasoning engine: binary decision tree for word classification, conviction-as-hysteresis system, self-evolving via LLM-assisted splitting. Non-transformer architecture. Long-term research project.
- **Anchor'77** — blackjack game in Swift, shipped on App Store.
- **Crypto trading bot** — Python, running live on KuCoin API.

Languages

- English, Russian

Education & Courses

- Ryazan State RadioTechnical University, 2023 | Professional retraining program, diploma
- RS School, 2021 | JS developer, certificate — JavaScript, TypeScript, React, Redux, Node.js, Webpack
- Udemy, 2020 | Modern Frontend — HTML5, CSS3/SASS, Gulp, jQuery, Git
